Wiring Diagram for Poly F405 2S-4S AIO V1.2

Pinout Diagram for Poly F405 V1.2

ELRS/ TBS Crossfire Receiver/ Analog System Wiring

Analog VTX

GPS/LED/Buzzer/SBUS Receiver Wiring

SBUS Receiver

In general. you can wire the DJI 03 unit to any free UART on the Poly board.

For users that don't use DJI radio controller, please refer to this diagram.

You don't need to wire the "Signal GND" and "SBUS" wire from the DJI VTX plug.

For users that use DJI radio controller, please refer to this diagram.

HDZero Whoop Lite VTX Wiring

Actually, you can wire HDZero Whoop Lite VTXto any sapre UART pads on Poly F405 board. The wiring diagram above is only for reference.

ELRS/ TBS Crossfire Receiver Betaflight Setup

In Betaflight 4.5, under "Ports" tab, enable "Serial Rx" under corresponding uart you set for the RX.

🖌 Setup	Ports					WIKI
😰 Ports	10113					
Configuration	Note: not all o	combinations are valid. When the	ne flight contro	ller firmware detects this the serial port	configuration will be reset.	tion if you do
📼 Power & Battery	Note: Do NO	disable MSP on the first serial	port unless yo	u know what you are doing. You may ha	ve to renash and erase your configura	uon ii you do.
💥 Presets	WARNING: Th	ne VTX table has not been set u	p correctly and	without it VTX control will not be possib	le. Please set up the VTX table in Video	o Transmitter tab.

Under "Receiver"tab, choose "Serial (via UART)" receiver mode and "CRSF" serial receiver provider.

🖋 Setup	Pacaivar									
🖌 Ports										
🏟 Configuration	Always check that your Failsafe is working properly! The settings are in the Failsafe tab, which requires Expert Mode.									
Power & Battery	• Disable the hardware ADC filter in the Transmitter if using OpenTx or EdgeTx. Basic Setup: Configure the 'Receiver' settings correctly. Choose the correct 'Channel Map' for your radio. Check that the Roll, Pitch and other bar graphs move correctly. Adjust the channel endpoint or range values in the transmitter to ~1000 to ~2000, and set the midpoint to 1500. For more information, read the documentation .

DJI 03 Betaflight Setup

1. In Betaflight 4.5, under "Ports" tab, please enable "Configuration MSP" and choose"VTX (MSP + Displayport)" for corresponding UART you set for DJI 03 VTX.

1.2. Under "Presets" tab, search DJI OSD, select "OSD for Fpv.wtf, DJI 03, Avatar HD " and select the corresponding uartyou set for the DJI VTX under "Options", finally click "Pick"

HDZero WhoopLite VTX Betaflight Setup

1.In Betaflight 4.5, under"Ports" tab, please enable "Configuration MSP" and choose"VTX (MSP + Displayport)" for corresponding UART.

2. To setup smart audio in Betaflight 4.5, please choose "VTX (Smartaudio)" under "Peripherals" for the correspondin UART.
